Public Works Authority

Invitation to Attend a Contractors Conference **Operation and Maintenance of Drainage Assets Framework Contracts**

In accordance with its strategy to deliver world class infrastructure that fulfil the Qatar National Vision 2030, the Public Works Authority 'Ashghal' announces the development of Framework Contracts to manage the operations and maintenance (O&M) of its drainage assets. Framework Contracts will be the primary mechanism in implementing the step change in capacity, flexibility and efficiency required by Ashghal to implement its growing drainage programme.

Ashghal is pleased to extend an invitation to infrastructure contractors, both local and International, to attend an Industry Briefing on 27th November, 2013. The Industry Briefing will provide an overview of Ashghal's Corporate Strategy and Vision and how the drainage O&M fits into that strategy, upcoming tender opportunities and specific information such as proposed works, timeline, and key implementation considerations.

The Framework Contracts, which are to be delivered by March 2015, include;

- Operations & Maintenance of Package Treatment Plants Framework
- Operations & Maintenance of Pumping Stations Framework
- Sewer Repair, Replacement, and Rehabilitation Framework
- Recycled Water Network and Services Framework
- Sewer Inspection and Cleaning Services Framework
- Supplies & Services Framework

Within each framework multiple contractors will be awarded contracts and single contractors may be awarded multiple Framework Contracts. Contracts will be for five (5) base years plus two (2), one year options. Only successful Framework Contractors will be provided the prospect of winning future work over the life of the Framework Contract.

The framework provides an opportunity for local Qatari companies to fully participate in the work to be awarded.

Event details are listed below:
Drainage O&M Framework Contracts Industry Briefing
